

PARTITION

for REFRIGERATION TRUCK

Light-weighted partition with durably high functions is the best for cooling transportation to separate cooling cargo spaces.

High Functions

Distinctively and durably cooling insulation.

Light weighted

20 kgs light weight with 60mm of thickness.

Affordable Price

High-standard materials with affordable price.

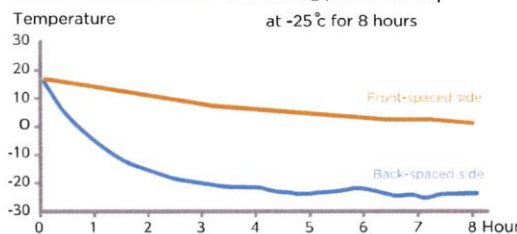

Operation Efficiency Up

2-part separable walls, user-friendly to set up or remove.

Experimental Temperature Control Data

To test temperature controlling and leaking prevention of partition at -25°C for 8 hours

Custom-made partition is also available, please feel free to contact us for further details.

Produced by Japan, made in Thailand

We have been manufacturing these products in Ayutthaya Thailand for price competitiveness. We selected Japanese-affiliated factory for subcontract manufacturer, and in order to ensure the Japan quality, we dispatched Japanese engineer on-site, and thoroughly trained the workers regarding know-how of manufacturing and inspecting or Japanese manufacturing/quality spirit. After a few months of training, they mastered necessary skills to manufacture the satisfactory products.

Had a good reception in exhibition

We participated in Cold Chain Show in Shanghai and our products gained acclaim by many visitors. It was a very good opportunity to expose our products to the customers in China, and let them know the quality and well-thought-out design of our products based on our long experience. It was also a good opportunity to know the needs of customer in China and we gained confidence to come into the Chinese market.

Highly recognized by leading truck body company

Our products are highly recognized by leading truck body company in China as a result of responding their requests with the solutions based on our long experience, and a high number of our products are introduced and delivered.
